Art Unit: 1761

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Soeters In view of Minifie for reasons of record.

Applicant argues that Soeters does not suggest mixing liquid chocolate with liquid seed material. This argument has been considered but is not persuasive because Minifie is relied upon to teach other types of seeding material, including liquid, as described in the last office action. Applicant argues that Minifie does not teach or suggest a seed material with a melting temperature above 30°C. But the claims, as written, do not define the liquid seed material as being 100% liquid seed material. The claims are open to the consideration of a liquid seed material composition containing fat crystals with more than one melting point. The bottom of page 148 of Minifie further describes well-tempered chocolate as containing only 3% to 8% cocoa butter seed.

Applicant argues that the references do not teach using the seed material at a temperature above 30C. But, as applicant points out, Minifie clearly sets forth this temperature. Applicant argues that the references do not show the use of material

Art Unit: 1761

from the exact cycle of the claims. But chocolate is generally manufactured the same way every day in both large and small companies. One of ordinary skill in the art would expect the chocolate from one step in one day would be made by the same process, even though it was in a different vat or made in a different day.

No claim is allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Application/Control Number: 10/048,139
